Professional Summary

I am a skilled software developer with over 3 years of experience in full-stack development, API design, and system integrations. Currently, I lead technology at Lehoa, specializing in building scalable platforms, managing deployments, and enhancing user experiences. I excel in solving complex problems, collaborating with teams, and delivering impactful solutions with a focus on innovation and efficiency. I am available to contribute to part-time or contractual challenging projects.

Work History

Full-stack Web Developer, Lehoa, Sao Paulo, Brazil

March 2022 - Present

- Spearheaded both frontend and backend development to ensure a seamless and user-friendly product experience.
- Implemented Stripe payment systems for both checkout and subscription services.
- Implemented integrations with Shopify, WooCommerce, Loja Integrada, and Nuvemshop to receive order data via webhooks.
- Built an organized admin panel to efficiently manage partner data, team information, and experience templates.
- Enabled bulk transfer of tree data from external sites to Lehoa's platform with a single click, providing a highly impactful solution.
- Worked on project deployment tasks, deploying applications to AWS using Terraform.
- Automated deployment processes using GitHub Actions for continuous integration and delivery.

Intern as Backend Developer, MISUI India PVT Limited, India

December 2021 - February 2022

- Learned and implemented API design principles following RESTful standards to ensure efficient and scalable backend communication.
- Implemented a robust sign-in and sign-up system with role-based authentication to manage user access effectively for an e-commerce website.

Projects
